

Sun Medical Co. Ltd. and Parkell, Inc. present

Restorative Materials Update 2010

Hands-on Adhesion Seminar featuring Brush&Bond and SEcure

Wednesday, September 15, 2010 from 5:00 pm to 9:00 pm
Seminar site: G&H Dental Arts * 4212 Artesia Blvd., Torrance CA 90504

Brush&Bond and **SEcure** are innovative, reliable, easy-to-use dental adhesive products manufactured in Japan by Sun Medical, and distributed in the USA exclusively by Parkell. By attending this seminar, you will learn the best way to use these products in a clinically successful manner. In addition, you will receive important information that you can use your first day back in the office to improve your practice's profitability.

In today's world of restorative dentistry, we are faced with many choices. What products work best and what are their limitations? This seminar will focus on the fundamentals of a popular self-etching bonding agent, Brush&Bond, as well as an adhesive resin cement system, SEcure. They are an ideal combination when used together. In this seminar presented by Dr. Shiro Suzuki, world-renowned researcher, lecturer and master clinician, all your questions relating to maximizing dental adhesion will be answered.

MAIN SPEAKER

Shiro Suzuki, DDS, PhD graduated from Tokyo Dental College in 1978 and obtained his PhD from Tokyo Medical & Dental University in 1982. After graduation, he worked as an Associate Professor at Showa University, Department of Prosthodontics prior to moving to the University of Alabama School of Dentistry in 1990. At UAB, Dr. Suzuki was a well-respected Professor and Director of Clinical Research in the Departments of Restorative Dentistry, Biomaterials, and Prosthodontics. He remains a Visiting Professor there in the Department of Prosthodontics. In 2006, Dr. Suzuki returned to Tokyo to establish his own dental clinic. In addition to practicing clinical dentistry, he presently works as an editor and peer reviewer of several academic journals, and maintains a strong interest in the degradation of dental materials under oral conditions.
